CHAPTER 1: PROFILE

Introduction

The modern state of Libya was established in 1951, when three historically distinct regions—Tripolitania, Cyrenaica, and Fezzan—were consolidated into the United Kingdom of Libya. The newly independent country was poor, largely because of the limits on agriculture in its desert environment. With the discovery of oil, the Libyan monarchy soon received immense revenues. Popular dissatisfaction with the unequal distribution of those revenues contributed to the overthrow of the king in 1969. The country’s new leader, Muammar Qadhafi, established a “stateless” state, in which power was theoretically vested in the people, but actually held by his regime. Qadhafi used oil money to fund socialist reforms at home while pursuing pan-Arab and anti-imperialist policies abroad. National oil revenues provided the general population with government jobs, low-cost housing, and social services. But the controlled economy lacked employment opportunities outside the public sector, and people lacked social freedoms and true political representation. Public discontent with economic inequality and political repression again led to the overthrow of the country’s ruler in 2011.

Arab culture—characterized by Islam and the Arabic language—is the basic social bond for the majority of the Libyan people. Most Libyans (and most North Africans) are an ethnic mix of Arab and Berber (Imazighan). Large numbers of sub-Saharan Africans have also contributed to Libyan culture and society as slaves, military recruits, and migrant workers. Libyan society is both traditional—emphasizing religious, familial, and tribal allegiances—and more modern than many Arab-Islamic societies, particularly in its treatment of women. In 2012, newly liberated Libya is a work in progress.

Geography

Libya is in North Africa, on the southern edge of the Mediterranean Sea. It shares borders with six countries: Tunisia to the northwest, Algeria to the west, Niger to the southwest, Chad to the south, Sudan to the southeast, and Egypt to the east. The Mediterranean Sea in the north is Libya’s only natural boundary. Measuring 1,770 km (1,100 mi), Libya’s shoreline is the longest of any African nation bordering the Mediterranean. Libya’s area of 1,759,540 sq km (679,358 sq mi) makes it one of Africa’s largest countries.

Libya is dominated by the Sahara, the world’s largest desert. The Sahara’s rocky plains and enormous sand seas contrast sharply with the farmed lowlands along the Mediterranean.

---

1 Sahara is the Arabic word for “desert.” Thus, while there are many saharas, there is only one desert named the Sahara. *Encyclopædia Britannica Online*, “Sahara,” 2012, [http://www.britannica.com/EBchecked/topic/516375/Sahara](http://www.britannica.com/EBchecked/topic/516375/Sahara)
is one of the least-densely populated countries in the world. The southern deserts are home to small populations of nomads, herders, and oasis farmers. About 90% of Libya’s population of 6.7 million live near the country’s long northern coastline, in less than 10% of the country’s total land area.³ 4

**Tripolitania (Western Region)**

Tripolitania, the most populous of Libya’s three historical regions, covers Libya’s northwestern quadrant.⁵ 6 Libyans now commonly refer to the area as the “Western Region.” The city of Tripoli lies on the Sahel al-Jefara, or Jefara Plain, that meets the Mediterranean coast. Inland from sandy beaches and marshes, the plain supports dry-land agriculture and irrigated farming.⁷ Groves of citrus, olives, and dates mingle with fields of grains and vegetables.⁸ South of the plain is the Jebel Nafusah, or Nafusah Plateau. The plateau’s ridges and areas of loose gravel and sand rise to a southern escarpment, which reaches 975 m (3,200 ft) above sea level. Traces of ancient volcanoes are visible in the escarpment’s black rock formations and lava fissures. *Wadis* (former water-runoff channels) deepened these fissures over time, creating many distinctive massifs (mountainous masses). Further south, other plateaus are swallowed by sand dunes.⁹

**Fezzan**

The least populated region, Fezzan makes up the southwestern portion of Libya.¹⁰ Fezzan is a large, elevated basin marked by numerous depressions that run east to west, and by vast *idehan* (sand seas) of the northern Sahara. Hidden in the region’s dunes are oases with vegetation and small lakes. Common features of this desert landscape include *wadis* (dry riverbeds) that lead to basins (*sarir*) of large salt deposits, and *ergs* (dune fields) that are shaped by shifting sands. Exposed, wind-eroded rock plateaus known as *hamada* are another common feature of the Fezzan desert.¹¹ In southwestern Fezzan, the low mountains of the Jebel Acacus contain famous archaeological sites and ancient rock art from before the ninth century B.C.E.¹² Toward Libya’s

---

center, the black basalt of the al-Haruj al-Aswad plateau spreads 40,000 sq km (15,400 sq mi) and holds dozens of volcanoes.13

**Cyrenaica**

Composing the eastern half of the country, Cyrenaica is Libya’s largest geographical region. It is home to more than 1 million people. Similar to Tripolitania, Cyrenaica’s topography contains a series of terraces that rise from the Mediterranean shoreline. Libya’s second-largest city, Benghazi, is located on the lowest terrace, on the eastern shore of the Gulf of Sidra. South along the Gulf coast, the salt flat Sabkhat Ghuzayyil is Libya’s lowest point at 47 m below sea level (−154 ft).14 Inland from the coast are the second and third terraces, sites of the ancient Greek cities of Cyrene and Barca. The land then rises into the Jebel al-Akhdar, or Green Mountains, which peak at 882 m (2,894 ft).15 Thereafter, the terrain descends into the Libyan Desert, which covers most of Cyrenaica. The Libyan Desert is a distinct sub-region of the Sahara that comprises three massive sand seas. The largest, the Great Sand Sea, originates in northeast Libya and runs southeast, deep into Egypt.16 At the southern edge of Cyrenaica bordering Chad, the Tibesti Massif mountain range contains Libya’s highest point, Bikku Bitti, which reaches 2,267 m (7,438 ft).17

**Climate**

Two geographic features determine Libya’s climate: the Mediterranean Sea and the Sahara. To the north, the Mediterranean climate has two main seasons: summer, from April through September, is hot and dry; winter is cooler and sometimes wet. Tripoli experiences average temperatures of 11°C (52°F) in January and 28°C (82°F) in July. The region is prone to extreme highs—in 1922, the town of Al-Aziziyah near Tripoli reached 58°C (136°F), a world record.18, 19 South of the coastal region, a desert climate predominates. Temperatures vary dramatically from day to night, from highs of 38°C (100°F) to lows below freezing.20

Libya receives less rainfall than other Mediterranean countries. The steppe regions in the north average less than 10 cm (4 in) per year, while the desert averages less than 2.5 cm (1 in)

---

annually. The wettest place in the country, along the east-central coast of the Jebel al-Akhdar mountain range, receives as much as 60 cm (24 in) of precipitation per year. East of these mountains, even the Mediterranean coastline is parched. West of the mountains, the north-central Sirte Desert reaches to the coast of the Gulf of Sidra.

Northern Libya periodically endures droughts that last 1 or 2 years. Drought is exacerbated by ghibli, desert winds that blow from spring through early summer, and then sporadically throughout the year. The sand-laden ghibli blow from the interior highlands toward the Mediterranean Sea. They can form a moving sandstorm wall up to 610 m (2,000 ft) high, ruining crops and killing exposed livestock within a few hours.

**Bodies of Water**

Libya has no significant natural bodies of water or permanent rivers and streams. The desert climate reduces seasonal water runoff to a small region along the Mediterranean coast. Small saline lakes occur in depressions between sand dunes. The Zellaf Dunes in the Fezzan region contain lakes that formed when fractures in the bedrock released water from a deep aquifer. Levels of natron (a mineral found with other salts) in these small lakes are so high that buoyancy is exaggerated. Ancient aquifers underneath the desert hold large freshwater reserves (tens of thousands of cubic kilometers) that feed small southern oases. The Great Man-Made River (GMR) project (Libya’s “Eighth Wonder of the World”) is tapping these aquifers to provide water for irrigated agriculture and cities to the north. Manmade reservoirs storing the collected waters of the GMR project are located near Benghazi, Ajdabiya, and Sirte.

---

Major Cities

Tripoli

Tripoli, also known as Tarabulus al-Gharb (“Tripoli of the West”), is Libya’s capital, business and cultural center, and main port. About 1 million people reside in the city, and another 1 million live in the greater metropolitan area. Called “The White City” for its brilliant white buildings that reflect the sun, Tripoli began as a trade route terminus for overland caravans and seagoing ships. Many historic buildings remain in the medina, the old walled quarter. Italians expanded the city with broad streets, parks, and colonial residences, and the modern section holds skyscrapers and factories. Planned use of the limited farmland provides the bulk of the region’s vegetables, fruit, tobacco, and grain supply, and fresh seafood abounds from nearby Mediterranean waters. Industries include tobacco processing, textile manufacture (especially carpets), auto assembly, and oil.

The city suffered physical damage and citizens were killed by both air strikes and street fighting during the 2011 civil war. The transitional government, the National Transitional Council (NTC), moved its headquarters from Benghazi to Tripoli in late 2011. In 2012, sporadic violence continued in the city from armed militias. Nevertheless, some residents began to return, and refugees from conflicts elsewhere began to arrive.

Benghazi

Libya’s second-largest city was once a Greek outpost and the historic capital of Cyrenaica. The city was later named for 15th-century marabout (Muslim holy man) Sidi ibn Ghazi, who may be buried nearby. Benghazi has two large, economically significant ports, and is a center for oil production and refining. The city endured protracted Axis-Allied fighting during World War II.

---

including repeated Allied bombing. In 2011, it emerged as the headquarters of rebellion against Qadhafi, and again endured air strikes (from both Qadhafi and NATO) as well as ground battles. Since the NTC moved from Benghazi to Tripoli, some regional leaders have urged Benghazi to take more autonomy in the new nation.

**Misratah**

Across from Benghazi on the western side of the Gulf of Sidra, Misratah is Libya’s third-largest city. Once a caravan transit point, it is now home to one of the country’s oldest carpet and textile industries, as well as a sizeable steel production facility. Although located between Qadhafi’s then power seats of Tripoli and Surt, residents of Misratah protested with Benghazi from the beginning of the 2011 uprising. When government security forces began shooting on 20 February 2011, the battle was on, and lasted until Misratan militia members captured and killed Qadhafi in October. Misratans elected a local council in February 2012 and are taking over management of their port. The Misratan militia is accused of human rights abuses against Qadhafi loyalists.

**Sabha**

The *de facto* capital of the Fezzan region, Sabha is Libya’s largest oasis. The oasis soil is fertile enough to grow crops such as onions, barley, and wheat. Sabha’s location at the junction of two major caravan routes linking the African

---

interior to the Mediterranean coast made it an important transit point. Nowadays, cargo travels in heavy trucks and camel trains on unpaved desert routes running southwest toward Algeria and southeast toward Niger and Chad. Sabha is home to many members of the Qadhadhfa tribe, and to immigrant populations from Chad, Niger, and Sudan. The city houses a military base, and became a Qadhafi stronghold during the 2011 civil war. In 2012, Arab-African ethnic violence threatens to overwhelm the authority of the NTC.

**Al-Khufrah**

Al-Khufrah is a series of small oasis communities in Libya’s southeastern desert. It was once the headquarters of the Sanusi Order, a Muslim brotherhood, and retains a Sanusi school in the town of Al-Taj. The oases draw water from the underground Nubian Sandstone Aquifer System. This giant system may contain as much as 375,000 cubic km (90,000 cu mi) of groundwater in chambers below Libya, Egypt, Sudan, and Chad. Al-Khufrah has become one of Libya’s largest inland agricultural endeavors. The diversion of water to irrigated farms in the region may be causing some oasis lakes to dry up. Al-Khufrah has been the site of repeated conflict since the onset of the 2011 civil war. Rebel and Qadhafi forces fought for its control in 2011. In 2012, intertribal conflicts continued, and had killed more than 100 people.

**History**

*Early History*

Neolithic peoples occupied Libya more than 10,000 years ago. The many different indigenous tribes came to be known collectively as Berbers, from the Roman word for barbarians, *barbara*, and the name *Barbary* for the North African coast. The ancient Egyptians knew one of the early Berber tribes as the *Lebu*. This is thought to be the root word for “Libya,” the name that...
the Greeks and others later applied to all of northern Africa except Egypt. Libya’s Mediterranean coast became a crossroads for a succession of ancient empires—Phoenicians, Greeks, Romans, Vandals, and Byzantines—who connected via caravan routes to the interior desert empire of the Garamantes and to other Berber tribes. From these early civilizations arose Libya’s historical geographic divisions: Tripolitania, Cyrenaica, and Fezzan. Arabs entered Cyrenaica not long after the death of the Prophet Muhammad in 632, and took most of Libya from the last of the Byzantine armies. In the 11th century, a larger influx of Arab nomads, or Bedouins, cemented Arab culture and the practice of Islam throughout North Africa. During the following centuries, Islamic dynasties and empires ruled Libyan territories.

Ottoman Rule

In 1551, Ottoman forces took Tripoli, beginning a long period of influence along the Libyan coast. Tripoli became a powerful regency of the empire. Military units of janissaries soon dominated the region. They ruled by force and were only nominally subject to a local governor, or pasha, resulting in frequent military coups. In 1711, Ahmed Karamanli, a cavalry officer of Turkish-Libyan descent, took control of Tripoli. His dynasty earned much of its income through piracy, extorting tribute from foreign ships in return for safe passage through Mediterranean waters. In 1800, the young United States Marine Corps and Navy were sent by President Thomas Jefferson “to the shores of Tripoli” to put a stop to the pasha’s demand for escalating American tribute for shipping. Tripoli’s economy soon declined and civil war erupted.
Ottomans reclaimed authority over the region in 1835, but their administration became less and less effective.  

The decline of Ottoman power allowed new leadership to emerge in Libya in the form of the Sanūsīyah, a Muslim brotherhood. Muhammad bin Ali as Sanusi (1787–1859), an Algerian-born Islamic scholar and holy man, found a receptive audience among Bedouins for his teachings. Sanusi promoted an ethic of extreme self-discipline, forbade fanaticism, discouraged reliance on alms, and stressed hard work instead. Though he developed few followers in Tripolitania, by 1902 a network of 146 Sanusi lodges connected most Bedouin tribes in Cyrenaica with followers throughout Africa and Arabia. Islam, filtered through Sanusi holy men, became the basis for settling intertribal disputes and for opposing the foreign occupations of the Ottomans and the Italians.

**Italian Colonization**

Italy declared war against the Ottomans in 1911 on the premise that Ottomans had armed Arab tribesmen in an effort to thwart Italy’s commercial interests in Libya. Libyans viewed the Italian takeover as an attack on Islam (not on the Libyan state), and the Sanusi brotherhood spearheaded decades of resistance through World War I and the 1920s. After years of guerrilla warfare, the capture and execution of Cyrenaican rebel leader Sheik Umar al-Mukhtar in 1931

---

\textit{Independence}

Independent Libya was created in the wake of World War II. The Allied Powers decided that Italy should not retain its colonial possessions, and assigned the task of making a new country to the newly formed United Nations. Tripolitania, Cyrenaica, and Fezzan were consolidated into the United Kingdom of Libya in 1951. Muhammad Idris, grandson of the Grand Sanusi, became king of one of the world’s poorest nations.\footnote{John Anthony Allan, “Chapter 1: Libya Before Oil,” in \textit{Libya: The Experience of Oil} (Boulder, CO: Westview Press, 1981), 19.} Libya was heavily dependent on the United States and United Kingdom for financial assistance until Standard Oil (the precursor to Exxon) discovered Libyan oil in 1959.\footnote{Daniel Yergin, \textit{The Prize: The Epic Quest for Oil, Money and Power} (New York: Free Press, 2008), 509–511.} \footnote{Anna Momigliano, “Carrying a Heavy Load of History, Libya’s Qaddafi Arrives in Italy,” \textit{Christian Science Monitor}, 10 June 2009, \url{http://www.csmonitor.com/World/Global-News/2009/0610/carrying-a-heavy-load-of-history-libyas-qaddafi-arrives-in-italy}} Within a decade, King Idris was suspected of funneling money to the Cyrenaican elite while most of the country remained impoverished.

\textit{Qadhafi’s Libya}

On 1 September 1969, 27-year-old Army captain Muammar Qadhafi came to power in a bloodless coup. He established the Libyan Arab Republic governed by a Revolutionary Command Council (RCC). His charisma contrasted sharply with the staid leadership of the ailing, 80-year-old King Idris. Qadhafi combined ideas of anti-imperialism and pan-Arab nationalism into visions of a future that inspired Libya’s youth. He deported some 20,000 ethnic Italians. Qadhafi declared 28 March and 11 June national holidays to mark the respective departure dates of the British and Americans from their military bases.\footnote{Ronald Bruce St John, “Chapter 1: Dismal Record,” in \textit{Libya and the United States: Two Centuries of Strife} (Philadelphia: University of Pennsylvania Press, 2002), 4.} \footnote{Ronald Bruce St John, “Chapter 1: Dismal Record,” in \textit{Libya and the United States: Two Centuries of Strife} (Philadelphia: University of Pennsylvania Press, 2002), 4.} He tried to remake the Libyan economy by nationalizing oil and banking, and eliminating private businesses and
ownership. He reorganized government into People’s Committees and Congresses to bring public opinion directly to him and to send his orders directly to the public.94 95 (These groups soon required the oversight of Revolutionary Committees, where membership was determined by loyalty to Qadhafi.96)

Qadhafi’s goals extended beyond Libya. He supported a range of insurgencies, including rebels in Sudan, Chad, and throughout the Sahel, as well as several Palestinian groups, the Basque ETA, the Baader-Meinhof gang, and the Irish Republican Army.97 When a Pan Am jet exploded over Lockerbie, Scotland in 1988, Qadhafi’s refusal to hand over Libyan suspects for trial resulted in U.S. and UN sanctions against Libya. The sanctions slowed Libya’s oil industry. Declining oil revenues decreased government spending on social services and public sector wages. Growing public dissatisfaction met with increasing surveillance and repression.98

Qadhafi’s Overthrow

In February 2011, the government’s arrest of a human rights activist sparked protests in Benghazi that quickly spread throughout Libya.99 When Qadhafi attacked the protesters from the air, the international community responded with a UN-approved, NATO-enforced no-fly zone.100 101 NATO soon began air strikes against Qadhafi forces, in support of the rebels and the civilian population. By August, armed opposition groups drove Qadhafi and his supporters from power in Tripoli to his hometown stronghold in Sirte. On 20 October, social media went viral with images and videos of Qadhafi bloodied, captured, and dead. His body (along with his son’s) went on public display in a cold locker in Misratah for several days.102 Although his tribe and his exiled family sought possession of his body for burial, the transitional government buried him in a secret location to prevent both veneration and desecration of the site.103 104

Government

For some Libyans, the tribe has always been the only meaningful governing organization, and the local tribal leader the only acknowledged political power. Libya’s constitutional monarch failed to transform Cyrenaican and Sanusi loyalties into a national identity. Qadhafi, always mindful of his Bedouin roots, tried to make Libya a “direct democracy” in which “the people” governed as a nationwide group. He invented the word Jamahiriya to name his “state of the masses,” and gave up his titles of authority to become known simply as “the leader” (or “Leader of the Revolution”). To replace tribal authority, he gave people’s committees and congresses responsibility for making law and implementing it at local levels. But these bodies had neither budget allocation power nor any input into the petroleum sector, law enforcement, armed forces, intelligence agencies, or foreign policy initiatives. In effect, Qadhafi was the government because there were “no institutions in Libya to share his power or challenge his behavior.”

In 2011, widespread defection among political and military officials contributed to Qadhafi’s downfall. The National Transitional Council, an opposition governmental administration of business executives, religious and secular scholars, doctors, lawyers, royalists, and tribal leaders, quickly developed in Benghazi, with international exile and diaspora ties. It reconstituted Libya’s national bank and national oil corporation in order to gain access to frozen funds and to sell embargoed oil. It later achieved international recognition as a legitimate representative of Libya. In 2012, the council and its appointed interim cabinet struggled toward elections, a new constitution, and centralized governmental authority over regional militias.

---

Media

Qadhafi justified state-controlled media on the grounds that every citizen was directly involved in policy making, thereby negating the need for an independent press to report government affairs. His son, Saif al-Islam, headed the company One-Nine Holdings (named for the 1 September 1969 coup that brought his father to power). He was tasked with overseeing 21st-century media privatization initiatives. Libyans, bored with government broadcasts, found their way to international content and technology. Some information warriors used their technical and social media connections to announce and assist the 2011 revolution. In 2012, the country faced the repair of some 20% of its telecommunications infrastructure, and a doubling of demand for internet access. Libyans and international observers watched for new government actions to guarantee a “free, open, and independent media and communications system.”

Economy

Libya’s economy is dominated by oil, which contributes about 95% of Libya’s export revenues. Substantial revenues from the energy sector, coupled with a small population, give Libya one of the highest per capita GDPs in Africa. Yet these numbers mask an unequal distribution of economic opportunities and benefits as well as high levels of underemployment, unemployment, and poverty (in 2012, the CIA reported that one-third of Libyans were at or below the national poverty line). The once widespread subsistence occupations of farming,

---

120 Northwestern University in Qatar, “Media Vision for Libya: A Good Offices Conference” (conference, Doha, Qatar, 10–11 December 2011), http://mediavisionlibya.northwestern.edu/a-path-for-the-future/
herding, and fishing now account for less than 20% of the employed labor force and contribute less than 5% to GDP. By contrast, industrial production (which includes oil and gas) contributes more than half of GDP with less than a quarter of the labor force (and industrial workers receive better compensation and benefits). Before the 2011 conflict, the majority of the employed population worked in services, including the government-subsidized public sector. Yet unemployment rates were estimated as high as 30%.

In 2012, postwar recovery of the oil sector was more rapid than expected. It remains to be seen how the larger Libyan economy will evolve after decades of Qadhafi’s control. The new government needs to attract continued foreign investment and expertise to further develop its extensive oil reserves for its small population. More importantly, the new government needs to fairly redistribute oil revenues and reinvest surplus income.

** Ethnic Groups **

About 97% of the Libyan population is Arab-Berber. Berbers, who call themselves Imazighan (singular Amazigh), are descendants of the native tribes of North Africa, whose presence there is thought to date at least 5,000 years. Arabs first migrated to the region roughly 1,400 years ago, bringing Islam and the Arabic language. Beginning in the 11th century, the large-scale immigration of Bedouins, or Arab nomads, led to the assimilation of most Berber tribes and the lasting Arabization of the region. Today, most Libyans share a predominantly Arab culture based on Sunni Islam and the Arabic language. Though the majority identify themselves as Arab, few can claim pure or even predominant Arab ancestry because of centuries of intermarriage with Berbers and the descendants of other peoples who occupied the region.

A small percentage of Libyans (about 3–5%) continue to identify themselves as Imazighan, although they are typically of mixed ancestry. They speak Berber languages and live in

---

small, tight-knit communities of farmers and pastoralists. Most Libyan Berbers live in the Tripolitania region, although some live in scattered areas of Cyrenaica and Fezzan.

The category “Berber” tends to mask the diversity of the many tribes that it encompasses. A distinct subgroup of Berbers, the Tuareg, are desert nomads found throughout the greater Saharan region, from Mali to Algeria and Niger. In Libya, they are concentrated in the west (around Ghadames) and southwest (around Ghat and Murzuq). A hardy, independent people, the Tuareg are sometimes called “the blue people” because the blue dye in their robes stains their skin. They practice a folk version of Sunni Islam and give high social status to women, for whom the privilege of reading and writing was traditionally reserved. In contrast to most Muslim communities, Tuareg men traditionally wear veils, while women are not required to do so.

Other ethnic groups include the Tebu (Toubou), farmers and herdsmen in southeastern Libya. Tebu Islamic practices are heavily influenced by the Sanusi Order, the austere Muslim brotherhood established in 19th-century Cyrenaica. Also in Libya are black Africans, who are often migrant workers or the descendants of slaves. This group includes peoples from Mali, Niger, Chad, and Sudan. Finally, Libya is home to Egyptian, Palestinian, and Tunisian immigrants, as well as small communities of Europeans such as Italians, Greeks, and Maltese.

Languages

Arabic is the most widely used language in Libya, and was the official language of the Libyan Arab Jamahiriya. There are three major dialects: Tripolitanian Arabic, Eastern Libyan Arabic, and Southern Libyan Arabic. Reflecting historical allegiances, the dialect spoken in western Libya (Tripolitania) is related to that of Tunisia, whereas the dialect used in the east is similar to Egyptian Arabic. Modern Standard Arabic (MSA), a formal version that is generally

understood throughout the Arab world, is used for all official correspondence and signage. English is widely used as a second language, and French and Italian are used or understood, particularly in urban areas.\footnote{144 Federal Research Division, Library of Congress, “Country Profile: Libya,” April 2005, \url{http://lcweb2.loc.gov/frd/cs/profiles/Libya.pdf}}

Chapter 1 Assessment

1. Before the discovery of oil, poverty conditions in Libya resulted in large part from agriculture and water scarcity.
   **True**
   Libya’s farmlands are concentrated along a narrow strip of the northern Mediterranean coast, and around a few desert oases.

2. In Libya, dry riverbeds known as *hamada* are a common feature of the desert.
   **False**
   *Wadis*, dry riverbeds, are a common feature of the desert—as are *hamada*, which are exposed, wind-eroded plateaus.

3. The occurrence of *ghibli* has a severe impact on the coastal region in Libya.
   **True**
   *Ghibli*, which are hot, sand-laden winds that are present mainly from spring through early summer, can ruin crops and kill exposed livestock within a few hours.

4. At one time, Libya was part of the Roman Empire.
   **True**
   Successive Mediterranean empires of Phoenicians, Greeks, Romans, and Byzantines claimed Tripolitania and Cyrenaica until Arabs arrived in the 600s. Ancient Garamantes held interior Fezzan.

5. Muammar Qadhafi freed Libya from Italian colonization in 1951.
   **False**
   Allied Powers demanded Italy’s withdrawal from Libya after World War II. Muhammad Idris became king of the independent constitutional monarchy of Libya in 1951.
CHAPTER 2: RELIGION

Introduction

Islam is the predominant religion in Libya. Arab armies introduced the religion to North Africa in the seventh century C.E. Its presence was firmly established in the region by the Bedouin tribes who began arriving in large numbers in the 11th century. Berbers and other native peoples such as the Tebu and Tuareg mixed Islam with their own religions, which sometimes included local saints, a belief in spirits, and magical practices. Over the centuries, brotherhoods formed around charismatic holy men (like Libya’s Grand Sanusi) who were believed to have spiritual power, or baraka. Under Qadhafi, Libyan Islam became progressive in some ways—Libyan women may even enter a mosque without covering their heads—but remained strict in others—alcohol is prohibited throughout the country, even within the non-Muslim, expatriate diplomatic and business communities. There are both hopes and fears about how the new Libya will incorporate shari’a (Islamic law) into a new constitution, new legislation, and a new society.

Libya’s non-Muslim minority are almost all foreigners. Christian congregations include Egyptian Coptics, Italian and Maltese Roman Catholics, Anglicans, and Greek and Ukrainian Orthodox. Small non-denominational (Unity) churches serve migrant workers from sub-Saharan Africa and the Philippines. Other migrant workers from south and east Asia practice varieties of Buddhism and Hinduism at home.

Islam

Islam is a world religion whose followers believe in a single deity. The Muslim community, or umma, calls this deity Allah. The Arabic term islam means “to submit” or “to surrender.” So a Muslim is one who submits to the will of Allah. Muslims believe that Allah revealed his

message to the Prophet Muhammad, a merchant who lived in Arabia from 570 to 632 C.E. They consider Muhammad as the last in a long line of prophets including Abraham, Moses, and Jesus. Allah’s message, as relayed by Muhammad, is delivered in the Quran, the sacred text of Islam. Additional doctrinal guides include the Hadith, a collection of the sayings of Muhammad, and the Sunna, which describes the behaviors or practices of Islam through Muhammad’s examples.

The essential beliefs and rites of the Muslim faith are realized in the Five Pillars of Islam. The first and central pillar is the faithful recitation of the shahada, or Islamic creed (literally “witness” or “attestation”): “There is no god but Allah, and Muhammad is the prophet of Allah.” The remaining four pillars are: performing ritual prayers five times per day, giving alms to the poor and needy, fasting during the holy month of Ramadan, and undertaking a pilgrimage to the Islamic holy city of Mecca. Muslims believe that Allah will judge them for their actions on earth. This judgment determines whether the follower’s afterlife is spent in either heaven or hell.

Islamic Sects

After the death of Muhammad, the umma fractured, primarily over the succession of authority. Some claimed that the community should choose a new leader, or caliph, from among the Prophet’s trusted friends. Others believed the leadership should be hereditary and remain within the family of the Prophet. After the violent deaths of several caliphs and generations of battles, the Shi‘ites broke away from the community to follow Muhammad’s descendants. Sunni Islam then emerged as the majority branch of Islam, currently representing 80% to 90% of the worldwide Muslim community, including Libya. Sunni Islam then emerged as the majority branch of Islam, currently representing 80% to 90% of the worldwide Muslim community, including Libya.161, 162 Sunnis rely upon the consensus of the umma to determine their leadership in the office of caliph. This is the greatest defining element of Sunni Islam: the community is “the locus of religious authority.”

Beyond the Sunni-Shi’a schism, other sects of Islam developed around particular doctrines, practices, or individuals. A North African sect, the Kharijites (or Ibadi), attracted Berbers with its doctrine that the caliph need not be a descendant of the Prophet, nor an Arab, nor a member of the elite. (Sunni Arabs tended to privilege other Arabs as Muslim leaders long after their

---

emigration from Arabia.) Practitioners of Sufism, or Islamic mysticism, seek a direct encounter with the divine through meditation, chanting, or dancing, and revere their holy men endowed with divine grace. Practitioners of Sufism, or Islamic mysticism, seek a direct encounter with the divine through meditation, chanting, or dancing, and revere their holy men endowed with divine grace.166 In 19th-century Libya, the Sanūsīyah, a Sufi brotherhood, formed around the Grand Sanusi, a well-traveled Muslim scholar and holy man.167 Sanusi combined an ethic of extreme self-discipline with a return to the fundamental teachings of the Sunna (the behavior or practices of Muhammad). His version of Islam was austere but not fanatic. It attracted Bedouins, Tebu, and other Cyrenaicans.168, 169 Independent Libya’s first leader, King Idris, was a descendant of the Grand Sanusi. 170

The Quran

The Quran is the sacred text of Islam. For Muslims, the Quran is the literal word of Allah (or God) as revealed through the archangel Gabriel to the Prophet Muhammad.171 Muslims handle Islam’s holy book with respect: they wash their hands and face before touching the Quran, keep the Quran off the floor and out of latrines, place the Quran on a book rest or hold it above the lap or waist if sitting on the floor, protect the Quran with a dustcover when not in use, place the Quran on the highest bookcase shelf, and place nothing atop the Quran.172

Religion and Government

Islam has been Libya’s state religion since 1951.173 In 1969, Muammar Qadhafi made his government the first explicitly Islamist regime in the eyes of the oil-importing world.174 In 1977, he declared the Quran to be his country’s constitution.175 Qadhafi made himself a kind of Muslim Martin Luther: in his Green Book, he wrote that the Quran could be read and understood by anyone fluent in Arabic without reliance on clerics for interpretation, an idea that amounted to

---

heresy in the eyes of the ulama (religious leaders). He took on the role of a mujtahid (a Muslim jurist), making his word final on all religious matters. The Qadhafi government outlawed the proselytization of Muslims, but ran the World Islamic Call Society, which trained students from outside the Arab world to become Muslim clerics in their home countries. The government repressed Muslim groups that had divergent visions of Islam, whether moderate or extremist, yet it did not restrict public worship by non-Muslims.

Since the end of Qadhafi’s repressive regime, tensions among Islamic groups have re-emerged. The National Transitional Council has indicated that Libya will continue to be run in accordance with shari’a—but exactly how remains to be determined in a new constitution and subsequent laws. The Council banned political parties based on religion, ethnicity, or tribe weeks before national elections scheduled for June 2012, but reversed the ban a few days later.

Religion in Daily Life

Generally, Libyan adults faithfully observe the Islamic sacrament of prayer five times a day. Those with busy schedules may occasionally say all their daily prayers at once. It is acceptable, particularly for women, to pray at home. Friday is the Muslim day of worship, and noon prayer

---

178 Though he was impatient with others’ theological disputes, which he considered debilitating to Arab unity, some of Qadhafi’s decisions seemed whimsical; in particular, his decision to move the first year of the Muslim calendar—marked by the Prophet Muhammad’s migration (hijra) to Medina—forward 10 years to the time of his death.
at the mosque remains an important event that is observed even by the less devout. Business stops for part of the day, and it is wise not to plan activities during this time.

At appointed hours (dawn, noon, mid-afternoon, sunset, and mid-evening), Muslims face Mecca and recite their prayers. While doing so, their body language reflects humility in the face of the Almighty.

**Exchange 1: When do you pray?**

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>When do you pray?</th>

<th>We pray five times a day.</th>
</tr>
</thead>
<tbody>
<tr>
<td>aamta tSalee?</td>
<td>inSalee Khams awgaat fee il-yom</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Libyans observe the Islamic prohibitions against alcohol, pork, and meat that is not *halal* (butchered humanely according to Muslim rituals). Islamic notions of modesty influence clothing styles, though Libya’s women are not required to veil.

In rural communities especially, pre-Islamic beliefs and practices have endured. Berbers believe in the *baraka* (spiritual powers) of *marabouts* (holy men), who may perform miracles or see into the future. Such holy men retain their powers even after death, and their tombs receive a steady stream of visitors seeking favors, such as help for attaining a high score on an exam or finding a suitable spouse. Tuareg men, considered vulnerable to magical attack, wear a veil to protect themselves from evil spirits.

**Religion and Gender**

Islamic custom has long shaped gender attitudes and practices in Libyan society. Men dominate the public sphere, while women socialize in private spaces with other women. *Purdah*, the

---

seclusion of women, is still practiced by segments of society. Many women also adhere to the related practice of hijab, in which they cover their heads when in public.

Qadhafi tried to meld Islamic law with gender equality. His government granted women the right to consent to their own marriages without parental approval. A wife’s consent was also required for a man to enter into polygyny (the practice of a man taking multiple wives). Libyan women also received enhanced divorce and property rights. In newly liberated Libya, some women fear the possible return of patriarchal interpretations of Islamic law; for example, that a man may impose polygyny rather than seeking his wife’s permission.

Among minority communities where folk Islam is practiced, women have traditionally maintained a significant public presence and a status equal to or even greater than that of men. For example, Tuareg women are thought to be less susceptible to the attack of evil spirits via the mouth, and thus do not need to veil.

Religious Holidays

Al-Hijra (New Year’s Day)

When Muhammad began preaching in Mecca, socially prominent families and some merchants became concerned that his sermons would lead to changes in the social order. To remove this threat, they devised a plot to kill him. Sensing danger, he fled to Medina, where he created the first Muslim community in which spiritual and earthly concerns were merged. Muhammad’s Hijra (migration) from Mecc to Medina in 622 C.E. was later designated as the starting date of the Islamic calendar, and Muslims

---

now remember the Hijra at the start of every year. The Islamic lunar new year is a quiet holiday and time to make New Year resolutions.

Most Muslims use the suffix “A.H.” to indicate “After Hijra” when citing historical years. When Qadhafi declared the starting date of the Islamic calendar to be Muhammad’s death in 632 C.E., the use of A.H. was dropped in Libya. Qadhafi’s eccentric calendar change is now likely to be dropped.

Mawlid al-Nabi (Prophet’s Birthday)

Muslims may observe the Prophet Muhammad’s birthday on the 12th day of the 3rd month of their lunar year. In Libya it may be a month-long celebration, when parents tell their children stories about Muhammad, public readings and prayers are conducted in his honor, and community festivities involve parades, music and dancing, and fireworks. On the Prophet’s official birthday, Muslims generally restrict their activities out of reverence because the same date serves as the anniversary of his death.

Libyan Muslims of conservative Islamist sects (sometimes referred to as Salafist or Wahhabist) frown on the celebration of birthdays or other anniversaries, claiming that Muhammad left no example to follow for such activities. Nevertheless, Libyan Sufis continued their traditional celebration of this holiday in 2012. In Benghazi, armed militia accompanied parade marchers, and Tripoli reported a record number of injuries (more than 100 people) from falling bullets and fireworks.

Ramadan

Ramadan, the ninth month of the Muslim calendar, is believed to be the time when Allah called Muhammad to be his Prophet. It is a month of fasting and prayer, and of trial through sacrifice. In Libya, all healthy adults are expected to observe the daylight fast. During the early hours of the morning, a drummer walks through the dark streets to awaken people who want to have a pre-dawn meal, known as suhur.

---

Libya’s desert climate requires planning in order to drink enough liquids between dusk and dawn. Business hours are erratic during Ramadan and private shops may be closed. Moreover, people may be irritable from fasting.

**Eid al-Fitr**

The fast of Ramadan ends with the feasting of *Eid al-Fitr*. At the sign of the first moon following Ramadan, Libyans put on their finest clothes, and join family and friends in a celebration of renewal and joy. Gifts may be exchanged and alms are given to the poor. Traditional foods include spicy *samosa* pastries filled with vegetables and meats, sweet cream cakes, and date-nut cookies. Large banquets may last for days. But in August 2011, Tripoli had dried pasta and canned tuna for its first *Eid al-Fitr* without Muammar Qadhafi.

**Exchange 2: Will you be celebrating Eid al-Fitr?**

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Will you be celebrating Eid al-Fitr?</th>
<th>hal tiHtifloo bee-‘eed il-fuTur?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Yes!</td>
<td>na'am</td>
</tr>
</tbody>
</table>

**Eid al-Adha (Feast of Sacrifice)**

The Feast of Sacrifice marks the end of *hajj*, the annual Muslim pilgrimage to Mecca. It begins on the 10th day of the last month of the Islamic lunar calendar, and lasts for 4 days. It commemorates the Old Testament narrative of Abraham’s willingness to sacrifice his son to God. Libyans traditionally slaughter a sheep and give meat to the poor. In November 2011, Tripoli residents struggled to find the cash to buy an animal, while shepherds in Sirte saw few buyers, suggesting subdued activities. Libya’s transitional government released hundreds of war prisoners on the occasion of Eid al-Adha, to the objection of some local groups.

**Places of Worship**

Mosques, the centers of spiritual and community life in Libya, are found in urban and rural areas. It is said that mosques echo the desert architecture of Muhammad’s house: a courtyard shaded by

---

an archway of palm trees and branches. Calls to prayer issue from the mosque tower, called a minaret. Inside, imams lead the daily prayers and give the Friday sermons.

Exchange 3: May I enter the mosque?

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>May I enter the mosque?</th>
<th>mumkin nudKhul il-masjid?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Yes.</td>
<td>na'am</td>
</tr>
</tbody>
</table>

In Libya, mosques have separate prayer rooms for men and women. Unlike Islamic communities elsewhere, a head covering (sometimes referred to as hijab) is not required for women in the mosque or in public. Still, many women, especially the older generation, veil before entering a mosque.

Exchange 4: Do I need to cover my head?

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Do I need to cover my head?</th>
<th>laazim inghaTee raasi?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>No.</td>
<td>laa</td>
</tr>
</tbody>
</table>

To avoid causing offense, visitors should be mindful of mosque etiquette before entering. Mosques typically provide running water in the courtyard to cleanse with before prayer, and a place to leave shoes before entering the building. Avoid contact with members of the opposite sex while at the mosque.

Exchange 5: Must I take off my shoes?

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Must I take off my shoes inside the mosque?</th>
<th>laazim inaHee kundortee daaKhil il-masjid?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Yes.</td>
<td>na'am</td>
</tr>
</tbody>
</table>

Chapter 2 Assessment

1. Qadhafi wrote the *Green Book* to gain the approval and support of the *ulama* (Muslim religious clerics).
   **False**
   Qadhafi wrote that anyone fluent in Arabic could read and understand the Quran without the interpretation of the *ulama*.

2. The second pillar of Islam is prayer.
   **True**
   For the prayer (*salat*), Muslims face Mecca and pray five times a day at appointed hours (dawn, noon, mid-afternoon, sunset, and mid-evening).

3. In Libya, Berber peoples practice varieties of folk Islam.
   **True**
   Islamic monotheism (belief in Allah as the one God) coexists with folk beliefs that humans possess spiritual powers to perform miracles and help worshippers.

4. Muslims in Libya are required to pray in the mosque five times a day.
   **False**
   Praying at home or elsewhere is acceptable. But even the less devout attend mosque for Friday noon prayer. Shops and businesses close on Friday noon.

5. Libya is an Islamic state that outlaws all other religions.
   **False**
   The constitution secures freedom to practice other religions. Non-Muslim religions in Libya include Christianity (Copts, Catholics, Anglicans, Greek and Ukrainian Orthodox), Unity non-denominational, Buddhism, and Hinduism.
CHAPTER 3: TRADITIONS

Introduction

Almost all Libyans are Arabic-speaking Muslims, descended from Berbers and Bedouin Arabs who could survive in the harsh desert environment. The traditions of modern Libya are largely shaped by the country’s nomadic heritage, the enduring influence of conquering civilizations, and the Islamic faith. Caravan traders spread goods and ideas from the interior of Africa. Berbers built settlements behind protective walls, but Romans and Greeks left an architectural imprint noteworthy for public space, and Italian colonists later did the same. Visit Arabs made fathers dominant in patrilineal families and a patriarchal society, while also introducing Islam, a source of tradition to both strengthen and challenge the family-based tribe. Oil wealth brought international consumer society to Libya (but did not end Libyan resentment against the colonizing West). The power of tradition is still evident in many aspects of society, from the patriarchal household, where the father’s dominance is absolute, to the limited entertainment options where genders are segregated and alcohol is prohibited (as are Western music, movies, theater, and even boxing and wrestling). It remains to be seen whether the changes of Muammar Qadhafi’s regime will last, particularly the decline of tribal authority and the rise of women’s rights.

Honor and Values

In Libya, the family is the core of society, and family reputation is paramount. Libya is sometimes described as a “collective culture,” where the individual is expected to subordinate personal interests and desires to the good of the group. Libyans value social harmony and hospitality. Because they are sensitive about how others view them, they learn to avoid actions that might publicly embarrass or offend others, such as failing to greet everyone upon entering a room, noting that someone is late, saying “no” to the requests of acquaintances, or ostentatiously displaying wealth or good fortune. When one’s ...

---
221 Francesca Di Piazza, “Chapter 4: Cultural Life,” in Libya in Pictures (Minneapolis: Lerner Publishing Group, 2006), 48.
family, honor, or generosity is questioned, the damage is difficult (if not impossible) to repair, and extreme retaliatory measures may result. Libyans value the safety of privacy, and protect the family women from unrelated men, as well as protect the family’s safety from government informers.\(^{227}\)

In Libya, as in many parts of the Arab Muslim Mediterranean, the traditional honor of men in the family rests on the behavior of their women.\(^{228}\) The importance of female virtue is impressed upon girls from an early age.\(^{229}\) The paradigm for a man’s loss of honor is a female relative having premarital sex; no exceptions are made for rape victims. Male honor (sharaf) can be impugned by the appearance of dishonor—a woman seen alone near unrelated men—or by a woman who chooses to challenge other community norms of feminine conduct. Honor killings of such women were the historical final penalty for unacceptable behavior. Honor killing now violates Libyan law and mandates a prison sentence.\(^{230}\) Such killings were reportedly uncommon in Libya in 2010.\(^{231}\) They reappeared during the 2011 conflict in which rape was used as a form of combat.\(^{232, 233, 234}\)

Greetings

Libyans tend to be sociable and friendly. Greetings are often enthusiastic and warm, especially among family and friends. It is important for visitors to engage Libyans with a smile and direct eye contact.\(^{235}\) But eye contact between genders should be limited, particularly in public.\(^{236}\)

<table>
<thead>
<tr>
<th>Exchange 6: Good morning.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Soldier:</strong></td>
</tr>
<tr>
<td>Good morning.</td>
</tr>
</tbody>
</table>

---

Upon meeting and departing, men shake hands. Handshakes among men can take a long time, and last as long as the initial verbal pleasantries take to complete. Women often embrace and kiss each other’s cheek. Men should not initiate a handshake or physical contact of any kind with women; they may shake a woman’s hand if she first extends hers.

Exchange 7: Peace be with you.

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Peace be with you.</th>
<th>salaamu 'aleykum</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Peace be with you.</td>
<td>salaamu 'aleykum</td>
</tr>
</tbody>
</table>

The most common greeting in Islamic cultures is as salaam alaikum, “peace be with you.” The proper response is wa laikum salaam, “and peace be with you.” A polite conversation might continue:

Exchange 8: How are you?

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>How are you?</th>
<th>keef Haalik?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Fine, very well.</td>
<td>bee-Kheyr wa il-Hamdo lilaah</td>
</tr>
</tbody>
</table>

It is best not to make specific inquiries about a man’s female family members:

---

**Exchange 9: How is your family?**

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>How is your family?</th>
<th>keef Haal 'aayiltik?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>They are doing fine, thank you.</td>
<td>hum bee-Kheyr shookran</td>
</tr>
</tbody>
</table>

During Ramadan, many businesses, restaurants, and government agencies are closed during the day. Some businesses and restaurants will open in the evening hours, when it is appropriate to engage in social gatherings or business discussions.

**Exchange 10: Good evening.**

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Good evening.</th>
<th>masaa il-Kheyr</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Good evening.</td>
<td>masaa il-Kheyr</td>
</tr>
</tbody>
</table>

When visiting in Libya, remember that codes of hospitality dictate that your hosts not ask you to leave, and they will likely encourage you to stay longer even when you stand up to leave.242

**Exchange 11: Good night.**

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Good night.</th>
<th>tuSbuH 'ala Kheyr</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Good night.</td>
<td>tuSbuH 'ala Kheyr</td>
</tr>
</tbody>
</table>

Greet Libyans with their title if it is known. Otherwise, use the equivalent of “mister” or “miss;” never use their first name unless they ask you to address them that way.243

**Exchange 12: Hi, Mr. Sheiki.**

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Hi, Mr. Sheiki.</th>
<th>ahlanyaa sayed sheyKhee</th>
</tr>
</thead>
<tbody>
<tr>

<td>Hello!</td>
<td>ahlanyu</td>
</tr>
<tr>
<td>Soldier:</td>
<td>Are you doing well?</td>
<td>inta kwayis?</td>
</tr>
<tr>
<td>Local:</td>
<td>Yes.</td>
<td>na'am</td>
</tr>
</tbody>
</table>

---

Male-Female Interaction

Given the burden of family honor that women bear, any public interaction between unrelated men and women is potentially dangerous. Affection is not for public display, even between married couples, and any necessary touching between male and female family members is minimized. Conversely, the distance maintained between men and women in a group will be much greater than that in any same-sex group, in which men may hold hands while walking together, or women may link arms.244

Perhaps contrary to Western assumptions that “poor country folk” will be more traditional, male-female segregation is more obvious among wealthy urbanites. In cities, women go out in public well-covered and in pairs or groups. Some remain secluded (purdah) because urban life puts them in proximity to men outside the family. The lifestyles of nomads and farmers make it impractical for women to veil and always depend on others for propriety outside the home. Rural women often work outside and unveiled, but only where they are less likely to meet an unfamiliar male.

Hospitality and Gift-Giving

For foreigners visiting a Libyan household, it is not necessary to bring a gift because the invitation has been extended without expectation of any type of reciprocity.

Exchange 13: I appreciate your hospitality.

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>I really appreciate your hospitality.</th>
<th>mutshakir 'aley Husun Deeyaaftik</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>I am pleased that you came to visit.</td>
<td>ana mamnoon min zeeyaartik</td>
</tr>
</tbody>
</table>

If a man must give a gift to a woman, he should say that it is from one of his female relatives. Small gifts for the host’s children are seen as thoughtful and are generally well-received.

Exchange 14: This gift is for you.

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>This gift is for you.</th>
<th>haadee la-hadeeya leek</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>I cannot accept this.</td>
<td>ma-nigdarsh nagbalha</td>
</tr>
</tbody>
</table>

Gifts should be presented with both hands or the right hand alone. The giver should politely insist, in order to allow the receiver to refuse the gift at first. Most Libyans will ultimately accept a gift—although if it is wrapped, it will likely be opened later.\(^{245}\)

**Food and Eating Habits**

Libyans take their food seriously, and they like to eat out as well as host dinner parties in their homes. When an invitation to join a family meal is extended, it is appropriate to initially decline by emphasizing how much effort it would be for the host. The host will insist and the guest should then accept the offer. When in the host’s residence, guests should accept hospitality, including an offer of coffee or tea, since it is also an offer of friendship. Perfumed water may be passed around the table before a meal. Dip three fingers as a form of ritual cleansing, in silence. The host may utter a short prayer before and after the meal.\(^{246}\)

Though many Libyan homes have a dining table, meals are taken in a separate room where the family sits on the floor. It is customary for the guest to start eating first. Otherwise, the oldest male starts first. Some families still observe the traditional practice of men eating first. In the presence of a foreign male guest, it is unlikely the women of the household will remain after serving the food.\(^{247}\) Nonetheless, they will ensure he is well fed, whatever their financial circumstances.

**Exchange 15: This food is very good.**

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>This food is very good.</th>
<th>haada iT-Ta’aam kwayis halba</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>It’s couscous.</td>
<td>hoowa kiziksee</td>
</tr>
</tbody>
</table>

Before the food is served, bread (*kesrah*) is placed on each plate; it is used to scoop up food. Communal dishes are placed in the center. Since cutlery is not used, it is important to take food and drink exclusively with the right hand, since the left is used only for bathroom activities. Do not touch your fingers to your mouth because this is considered unsanitary.\(^{248}\)

---

Exchange 16: Making bazeen

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>What ingredients are used to make bazeen?</th>
<th>shin il-mawaad il-mustaKhdim li-'amel il-baazeen?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Dough, lamb, eggs, and spices.</td>
<td>'ajeen, laHem Kharoof, daHee, wa-bhaaraat</td>
</tr>
</tbody>
</table>

Spices and herbs are essential to Libyan cuisine. The most common spices include saffron, ginger, chili peppers, and salt. It is not considered rude for guests to inform the host they cannot eat spicy food. Indeed, unfamiliarity with the types of food Libyans eat can serve as an excuse to decline further helpings.

Exchange 17: Only mildly spiced, please.

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Could I have the food only mildly spiced, please?</th>
<th>min faDlik nigdir naaKhid maakla Haara shwaya bis?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Of course.</td>
<td>Tab'an</td>
</tr>
</tbody>
</table>

Conversation is minimal during the meal.249 Afterward, another prayer will be offered. It is important to compliment the host for the food that the family put much time and effort into preparing.

Exchange 18: The food tastes so good.

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>The food tastes so good.</th>
<th>il-akil Ta'maa kwayis halba</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Thank you.</td>
<td>shookran</td>
</tr>
</tbody>
</table>

Dress Codes

Libyans have traditionally dressed according to Islamic norms. Men wore white tunic robes with a turban knotted to convey where they were from. Females began to veil at puberty, and married women appeared outside only in black, to denote their marital status.250 Older Muslim women may still wear the burqa, a veil-like head cover, when outside the home in the presence of unrelated men. A blend of modern and traditional styles is now visible, especially in the cities along the Mediterranean coast. For special occasions, young men may wear a traditional tunic without the religious headwear. Otherwise, they typically dress in casual Western clothing. Traditional Islamic dress for adult women combines a long black outer garment, the abayah.

with a headscarf. Younger women wear blouses and even form-fitting jeans, but in deference to social mores, they wear the *abayah* as a coat in public. Bare arms and legs are inappropriate, and female visitors should avoid sleeveless blouses, miniskirts, and shorts.

**Exchange 19: How should I dress?**

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>How should I dress?</th>
<th>keef laazim nalbis?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Wear loose fitting clothes which cover your body.</td>
<td>albis malaabis waas'a ilee bitghaTee jismak</td>
</tr>
</tbody>
</table>

Since the 1980s, there has been a trend toward veiling in Libya. It has been viewed not as a reflection of increased piety but simple economics. A fashionable wardrobe costs money and, until recently, few households had such disposable income in Libya’s deteriorating economy.251 Visitors will encounter a surprising amount of risqué fashion on sale in the *souk* marketplace, though it is worn exclusively within the home.

**Exchange 20: Is this acceptable to wear?**

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Is this acceptable to wear?</th>
<th>haada maqbool lee-libis ?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Yes.</td>
<td>na'am</td>
</tr>
</tbody>
</table>

Non-Muslim visitors, both male and female, can wear pants in public. It is permissible for men to wear Western-style sportswear during sporting and leisure activities. In practice, younger generations of men go shirtless on the beach, wearing only shorts or swim trunks.

**Social Events**

**Weddings**

Libyan weddings are increasingly costly affairs, lasting several days and with hundreds of guests.252 At the opening banquet, male and female guests are entertained separately with music and dancing.

---

Exchange 21: Congratulations on your wedding!

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Congratulations on your wedding!</th>
<th>alif mabrook 'aley zafaafik</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>We are honored you could attend.</td>
<td>tasharafna bee-HuDoorik</td>
</tr>
</tbody>
</table>

In the following days, the groom provides henna dye for the bride to be decorated with patterns on her arms, hands, and feet; female well-wishers bring gifts for the white-clad bride; the groom lunches with his male friends; the bride moves into her new home amid a procession of honking horns and teasing friends; finally, the newly linked extended family shares an elaborate brunch.253

Exchange 22: I wish you happiness.

Wedding photography is also gender-segregated and not for public sharing.254

Funerals

At the moment of death, the deceased’s eyes are closed in accordance with the hadith, “when the soul (ruh) is taken, the eyesight follows it.” This is intended to ease the soul’s fear of leaving the body.255 Family members of the same gender as the deceased wash the body in clean water or sand, and wrap it in clean linens in preparation for burial. Only men attend the funeral. The deceased is buried in a shallow grave, the body’s right side facing Mecca. Women grieve, wailing, at the home of the deceased.256, 257 They may visit the grave separately later.

Exchange 23: Please be strong.

</tbody>
</table>

---

It is appropriate to extend condolences after burial, to help the next of kin accept that the death was part of Allah’s plan. People gather at the home of the deceased for three nights after the burial. Men read the Quran aloud and make supplications on behalf of the deceased. On the last evening, the family serves a meal; part of it will be donated to the local mosque for the poor. Clothing of the deceased may be distributed to the poor as a final means to accrue merit. After the passage of 40 days, all immediate members of the deceased’s family visit the grave. In the evening, they will host another prayer session and provide a meal for those who attend.²⁵⁸

Exchange 24: I would like to give my condolences.

| Soldier: | I would like to give my condolences to you and your family. | in'aazek wi-n'azeen 'eltik |
| Local: | Thank you. | shookran |

Non-Religious Holidays and Festivals

National Holidays

During Qadhafi’s rule, holidays changed often. For example, in 2005, when bilateral reparation negotiations over Italy’s colonial legacy were stalled, Qadhafi proposed a Vendetta Against Italians Day. After an agreement was signed by Qadhafi and Italian Prime Minister Silvio Berlusconi in 2008, Qadhafi proclaimed a Libyan–Italian Friendship Day.²⁵⁹ Libya’s holiday calendar will probably continue to change during the next few years as the country’s new government evolves. In addition to the major Muslim observances (the Islamic new year, the Prophet’s birthday, Ramadan and Eid al-Fitr, and Eid al-Adha), national holidays announced for 2012 are:²⁶⁰, ²⁶¹

<table>
<thead>

</tr>
<tr>
<td>Martyr’s Day</td>
<td>Sep. 16</td>
<td>Libyans who died for their country</td>
</tr>
</tbody>
</table>

Liberation Day
Oct. 23
End of the 2011 revolution (new in 2012)

Day of Mourning (Deportation Memorial Day)
Oct. 26
Libyans who were killed and exiled during the Italian occupation

Independence Day
Dec. 24
Defeat of Italy in World War II, and 1951 proclamation of independent Libya (restored in 2012)

Apparently discontinued are holidays that commemorated the creation of the Jamahiriya (2 March), the evacuation of military bases by Great Britain (28 March) and the United States (11 June), and the 1969 revolutionary coup (1 September).

Festivals
Local annual events celebrate ethnic traditions. Every year between November and January, Tuaregs meet in the remote, southwestern border town of Ghat at the Acacus Festival to share food, music, dance, handicrafts, camel racing, and wrestling. In the north, Berbers of the Jebel Nafusah region hold the Qasr Festival honoring their traditions. The residents of the ancient caravan settlement of Ghadames mount an international festival each autumn. Ghadames is a UNESCO World Heritage site, where homes are joined by covered passageways that protect residents from the desert climate’s extremes. During the three-day festival, the walkways are lit and people welcome each other and travelers into their homes for music and singing late into the night. Outside the settlement walls, horses and camels are adorned in ceremonial saddles and attire, and compete in racing contests.

Dos and Don’ts
Do show deference to the elderly.
Do show respect for a person’s family, and gratitude for their generosity.
Do shake hands when greeting men; be prepared for a prolonged handshake.
Do keep your hands out of your pockets while talking to people.

Do smile and make direct eye contact, although eye contact should be intermittent rather than constant.

Do be punctual, but don’t expect that from your host, who may be running behind with previous engagements.

---

262 Francesca Di Piazza, “Chapter 4: Cultural Life,” in Libya in Pictures (Minneapolis: Lerner Publishing Group, 2006), 55.
Do remove your shoes when entering a mosque or private residence.
Do ask permission before taking photographs of people.
Do be careful of what you admire: you may be forced to accept it as a gift.
Don’t extend your hand when greeting a female, but reciprocate if she initiates contact.
Don’t make specific inquiries about a man’s female family members.
Don’t show the soles of your feet.
Don’t use your foot to point at any person.
Don’t touch your fingers to your mouth while eating.
Don’t wander around eating or drinking; consumption is restricted by law to appropriate venues.
Don’t eat or pass items with your left hand, which Muslims reserve for activities conducted in the bathroom.
Don’t wear clothing that is tight or bares shoulders, arms, or legs.
Don’t offer money in exchange for assistance from a Libyan, if the help was extended in the spirit of hospitality.
Chapter 3 Assessment

1. In public settings, Libyan men and women greet each other by shaking hands.
   **False**
   Men shake hands when meeting, and women may embrace each other. A man may only shake a woman’s hand if she first extends hers.

2. In Libya, the importance of female virtue is impressed upon girls from a young age.
   **True**
   Male honor rests on female conduct. The shame of extramarital sex, even rape, sometimes causes honor killings, when men murder an offending female relative.

3. Libyan women must wear the *burqa*, a veil-like face and head cover, when in public.
   **False**
   Older Muslim women might wear the *burqa* outside the home in the presence of unrelated men. Many Libyan women wear headscarves in public.

4. Tuareg women, like other rural folk, are more traditional and conservative in their dress and public behavior than city residents.
   **False**
   Rural women work outside the home unveiled, where they are less likely to meet unrelated men. Urban women venture outside home well-covered, and only in groups.

5. An important wedding ritual for a Libyan bride is the henna decoration process.
   **True**
   The groom provides henna for decorating the bride with patterns on her arms, hands, and feet. Libyan weddings, which last several days, are increasingly costly.
CHAPTER 4: URBAN LIFE

Introduction

Libya’s coastal cities have long, cosmopolitan histories, and continue to be the political, economic, and cultural centers of the country. The desert environment may have limited the size of interior oasis cities, but not their importance to economic trade, oil and agricultural production, and military strategy. Under Italian colonization, rural migrants began to arrive in the coastal cities, where they created communities of people from the same place. These urban communities retained patterns of social organization of particular tribes (or clans). Although many urbanites no longer live together in extended families, kin often live near each other, providing a family support system. The oil boom of the 1960s and 1970s brought migrant workers from outside Libya. The makeup of urban neighborhoods shifted from tribal affiliation to economic class. In Qadhafi’s cities, Libyan nationals enjoyed state-provided, high-rise housing. By contrast, migrant workers lived in squatter settlements. They took jobs that Libyans consider undesirable, and Qadhafi welcomed them in an effort to improve his stature throughout Africa.

Urbanization Issues

Libyan cities have not kept pace with the infrastructure needs of their inhabitants. The government organized and financed major projects to supply water, power, and housing. Similar to the oil industry, urban development depended on foreign expertise and labor. These efforts were not enough to meet the population growth from both migration and high birth rates. The effects of fluctuating oil prices and international economic embargoes interfered with the implementation of urban development projects. Most recently, civil war damaged most Libyan cities.

267 Great Man Made River project
Updating the telecommunications sector was a priority in recent years.\textsuperscript{272} The government reported that the average Libyan used two mobile phones in 2010. Outside analysts believed the figure to be lower, although the uneven service of mobile networks across the country led many Libyans to have two phones.\textsuperscript{273}

**Exchange 25: What is your telephone number?**

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

In 2011, war damage to the networks cut phone contact between east and west Libya for a time. In 2012, mobile phone cards were in short supply, and internet access was sluggish and intermittent.\textsuperscript{274} Plans to open Libya’s state-owned phone companies to international participation were on hold, and media policy was not a priority of the transitional government.\textsuperscript{275}

**Work Problems in Urban Areas**

Libyan cities face many social problems of urbanization: there are not enough opportunities or services for the growing population. Youth unemployment is a particular challenge. Not only is the percentage of the youthful population rising, but the younger generations learned to expect government-subsidized, public sector jobs. Libya’s transitional

government announced a substantial youth job training support package in 2012. Some analysts warn that continued government subsidies are not sustainable. Meanwhile, Libya continues to depend on foreigners for highly-skilled and unskilled labor. Libyans periodically call for the expulsion of migrant workers. Non-Muslim Africans are especially vulnerable and often fear for their safety. During the 2011 conflict, hundreds of thousands of migrant workers fled Libyan cities. Tens of thousands found themselves blocked from returning to their home countries, and some were forced to return to their work.

Some 40% of city women work outside the home, largely in “pink collar” service professions like teaching, nursing, and secretarial support. Separate workspaces are maintained for men and women (a particular challenge for female healthcare workers). Women report being excluded from business meetings and work opportunities on the basis of their gender. The Qadhafi government did not subsidize daycare for working mothers, a provision that would likely have caused a backlash from more conservative quarters of society. As a Libyan woman explained, “The husband still depends on her to take care of the children, the housework, and cooking.” Consequently, the phenomenon of the single career woman has emerged in Libya, challenging the social norm that women should not live alone.

**Healthcare**

Libyan healthcare improved greatly in the first years of Qadhafi’s socialist government. Residents of Tripoli and Benghazi gained access to major public hospitals, which were staffed by

---

foreign specialists and linked to medical schools. Clinics opened in smaller cities as well.287, 288, 289

Exchange 27: Is there a hospital nearby?

<table>
<thead>

</tbody>
</table>

From the late 1980s, declining government revenues led to supply shortages and hygiene issues, such as the reuse of syringes.290 In the late 1990s, the HIV virus spread among more than 400 children in a Benghazi hospital. Because Benghazi is a city of extended clans, many people considered themselves kin to any one of the victims.291 Public outrage escalated after a Libyan magazine, which was quickly shut down, publicized the children’s plight.292 The Qadhafi government accused expatriate hospital staff from Bulgaria and Palestine of deliberately infecting the children. (Subsequent investigation suggested that the hospital’s infection more likely originated with sub-Saharan guest workers and spread through poor medical practices.) The accused spent years in prison fighting convictions that mandated the death penalty.293 After international outcry, they were allowed to leave the country in the summer of 2007.294

</tbody>
</table>

In the aftermath of the 2011 civil war, hospitals continued to rely on foreign staff and funds. New health needs included psychosocial support for traumatized war victims (Libya had only 14 psychiatrists in February 2012). Tens of thousands of Libyans were referred for treatment available only outside the country.

**Education**

Like housing and public healthcare, education is free. Schooling is mandatory until the age of 15, and many Libyans go on to vocational schools or universities. For the September 2011–2012 school year, the new education ministry removed Qadhafi-era textbooks from the classroom and provided temporary replacement materials, including simple pamphlets describing concepts such as human rights, citizenship, and voting. In most cities, boys and girls attend school together, and universities are coeducational. Benghazi is home to Libya’s first modern university (est. 1955). The university’s Tripoli campus later became a separate institution, with over 120,000 students enrolled in early 2012.

---

300 Nick Clark, “Education in Libya,” *World Education and News Review* 17, no. 4 (July/August 2004), [http://www.wes.org/ewenr/04jul/Practical.htm](http://www.wes.org/ewenr/04jul/Practical.htm)
Restaurants and Dining

In the years before the 2011 uprising, a growing stream of businesspeople improved the economic outlook for the hospitality industry in Libya’s urban areas.\(^{305}\) Getting a decent table at one of Tripoli’s better seafood restaurants became increasingly difficult.\(^{306}\) Even in postwar Libya, visitors are likely to find certain Libyan dietary rituals. According to an American traveler, “Restaurant meals, dinners in hotels, even sandwich lunches eaten at truck-stop cafes while our driver refueled his little bus—all began with a bowl of Libyan soup.”\(^{307}\)

**Exchange 30: I’d like some hot soup.**

<table>
<thead>

</tbody>
</table>

If you rent a car in Libya, you may also want to hire a driver. Road signs are only in Arabic, and one-way streets are common. Before the 2011 civil war, foreigners were permitted to travel unaccompanied through the urban areas of the Mediterranean coastline, but an escort was required for groups of four or more when traveling to the interior. In 2012, the presence of independent militias made unaccompanied travel risky in most Libyan cities.

Exchange 48: Where can I rent a car?

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Where can I rent a car?</th>
<th>immeyn nigdir nikree sayaara?</th>

Chapter 4 Assessment

1. The Libyan medical establishment is renowned for its locally trained specialists.  
   **False**  
   Foreign doctors and medical personnel staffed most of Libya’s hospitals before the 2011 conflict. In 2012, many Libyans must travel abroad for specialized medical treatment.

2. Cosmopolitan Tripoli has road signs in Arabic, Italian, and English.  
   **False**  
   Libyan road signs are in Arabic only, and unmarked, one-way streets are common.

3. Libya depends on foreigners for both highly-skilled and unskilled labor.  
   **True**  
   In times of economic or political difficulties, Libyans call for the expulsion of migrant workers, especially those from sub-Saharan Africa.

4. The telecommunications sector has expanded in recent years with increasingly widespread cellular service.  
   **True**  
   The 2011 civil war interrupted service between the east and west of the country. Reconstruction and international development await the approval of the new government.

5. Schools and colleges in urban Libya are coeducational.  
   **True**  
   Boys and girls attend classes together. But they sit at separate desks in primary schools, and on opposite sides of university lecture halls.
CHAPTER 5: RURAL LIFE

Introduction

The Sahara has long served as a buffer between the historical regions that became modern Libya. Each tribe of Tripolitania (Western Region), Cyrenaica, and Fezzan developed a particular way of life. Desert subsistence made a certain amount of exchange necessary for food security. Pastoralists (herders) exchanged animal meat with farmers who grew crops around the oases. Nomadic traders shepherded exotic goods along tribe-controlled caravan routes.

In the 19th century, Tripolitania’s rural herders and farmers began to supply meat and grain to the British navy in Malta. Later, *halfa*, or esparto grass, became Libya’s first major cash crop grown solely for export (to European papermakers). It contributed to the rise of a class of wage laborers whose survival depended on the market, rather than their tribe. Oil, discovered in 1959, replaced *halfa* as Libya’s primary export and generated non-farming employment opportunities. Rural migration to the cities eventually led to a decline in agricultural production (despite government efforts to settle nomads and resettle farmers). Today, only about 20% of Libya’s population live and work in rural areas.

Tribal Distribution

Libyan society is based on a complex tribal system, with 140 tribes. Most tribes are considered Arab, the descendants of migrants who began to arrive over 1,000 years ago. Viewed from outside Libya, these tribes merge into the Arab-Berber ethnic group that makes up 97% of the population. Inside the country, Libyans recognize differences among the tribes. Although many tribal members live in the urban coastal areas, tribes maintain rural and interior bases. Some analysts suggest that tribal

---

Longitudes are more important in rural areas than in urban areas. Traditional (and shifting) rivalries between tribes account for many historical and current conflicts between Libya’s cities and regions. Some tribal groups that may play significant roles in Libya’s postwar reconstruction include the Abu Llail, Misurata, Senussi, and Obeidat to the east, and the Warfalla, Magariha, Zuwaya (or Zawiya), and Bani Walid to the west. (The Qadhafah and Al-Awaqir groups, once allied with Qadhafi, may also be heard from.) Some tribes, including the Berber, Tuareg, and other minority groups, remain in rural areas and persist in their way of life.

Land Distribution

Historically, land in Libya was divided between tribes and treated as communal property. The Ottomans introduced a system of land ownership in 1858, to create an efficient structure for individual taxation by monetizing the value of a family’s property. During the subsequent period of Italian colonization, the government claimed formal ownership of the land in order to resettle Italians in a “land to the tiller” program—an effort to revive Libya’s ancient Roman past. Still, tribal claims remained.

Exchange 55: Do you own this land?

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Do you own this land?</th>
<th>timlik haadee il-arID?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Yes.</td>
<td>na'am</td>
</tr>
</tbody>
</table>

At independence, King Idris relied on tribal leaders to oversee local affairs, although their authority was no longer undisputed. When Muammar Qadhafi overthrew the monarchy in 1969, he viewed ancient tribal loyalties as an obstacle to his revolutionary agenda. To undermine these traditional lines of authority, he divided the country into zones that lumped different tribes together. Moreover, entire villages were relocated when they were declared to be no longer

---

viable farming communities.\textsuperscript{332} Rural residents’ fraying tribal ties and growing dependence on the state for social services enabled the police to become the local authority.

\textbf{Exchange 56: Is the police station close by?}

\begin{tabular}{|l|l|l|}
\hline
Soldier: & Is the police station close by? & markiz il-bolees greeb min eh-ney? \\
\hline
Local: & Yes. & na'am \\
\hline
\end{tabular}

With the end of the Qadhafi regime, tribal land claims are likely to be reasserted, and rural law enforcement may be in the hands of local militias for some time.\textsuperscript{333}

\textbf{Exchange 57: Can you take me to the police station?}

\begin{tabular}{|l|l|l|}
\hline
Soldier: & Can you take me to the police station? & tigdir tarfa'nee li-markiz il-bolees? \\
\hline
Local: & Yes. & na'am \\
\hline
\end{tabular}

\textbf{Rural Economy}

Libya’s rural populations traditionally practiced subsistence herding, farming, and coastal fishing. Men’s work took them far from home: for example, following camels and cattle. Women worked closer to the camp or homestead, but also herded smaller animals and tended crops, as well as cared for children and elders.

\textbf{Exchange 58: Where do you work?}

\begin{tabular}{|l|l|l|}
\hline
Soldier: & Where do you work? & weyn tiKhdim? \\
\hline
Local: & I am a farmer. & aaney muzaari' \\
\hline
\end{tabular}

Colonial and national governments tried to scale agricultural activities to industrial levels, to meet rising populations. Now, major field crops are wheat, barley, and sorghum. The Italians introduced olive trees. Other tree fruits are almonds, citrus, apricots, and figs. Southern oases specialize in dates. In Cyrenaica, herders raise sheep, goats, cattle, camels, horses, donkeys, and mules.\textsuperscript{334} In 1958, before the influx of oil revenues, agriculture contributed about 26\% of GDP, and Libya was self-sufficient in food production.\textsuperscript{335} By 1978 agriculture had plummeted to 2\% of GDP, and domestic food production eventually dropped to only about 25\% of

\textsuperscript{334} \textit{Encyclopædia Britannica Online}, “Libya: Agriculture, Forestry, and Fishing,” 2012, \url{http://www.britannica.com/EBchecked/topic/339574/Libya/46550/Agriculture-forestry-and-fishing}

consumption. The government tried to increase domestic agriculture with the Great Man-Made River project (GMR), which taps aquifers under the southern desert for irrigated farmlands.

Transportation and Lodging
Libya’s 100,000 km (62,000 mi) of roads connect all the cities and settlements along the northern coast. Three main arterials run south from the coast: two in the west to the Sabha oasis and on to Ghat near the Algerian border, and one in the east to the Al Khufrah oases. Over half the roads have been paved (although some were damaged in the 2011 conflict). Heavy trucks have joined camel trains on desert trade routes, connecting remote rural settlements to economic and social benefits concentrated in urban areas.

Exchange 59: Do you know this area very well?

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Do you know this area very well?</th>
<th>ta'rif il-manTiqa haadee kwayis?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Yes.</td>
<td>na'am</td>
</tr>
</tbody>
</table>

Driving in rural areas can be especially hazardous. Traffic laws are not enforced and roads merge into single-lane highways without warning. Sand deposits and roaming wildlife (particularly camels) pose additional travel hazards after dark. Crimes of opportunity, in which unattended vehicles are targeted for break-in, are far more prevalent than armed robbery.

Exchange 60: Did these people threaten you?

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Did these people threaten you?</th>
<th>in-naas hadoooma hadidook?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Yes.</td>
<td>na'am</td>
</tr>
</tbody>
</table>

---

In rural areas, Libyan hospitality generally far exceeds the level of accommodations. In various rural areas around interior oases, visitors can camp in their own tents. Hotel facilities range from tents with remote, shared toilets to mud-brick cottages with thatched roofs—some with private baths that may have bathtubs.342

**Exchange 61: Is there lodging nearby?**

<table>
<thead>
<tr>

<th>Is there a medical clinic nearby?</th>
<th>Hal fee 'eeyaada greeb min eh-ney?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Yes, over there.</td>
<td>na'am, eh-naak</td>
</tr>
</tbody>
</table>

---

Rural healthcare is likely to lag behind urban health care for some time in the aftermath of the 2011 civil war. Cultural traditions of folk medicine might be filling the gap. Older family members, with knowledge and stores of medicinal plants, use herbal remedies to treat common ailments. Knowledgeable local specialists practice herbalism, bone-setting, circumcision, traditional midwifery, and spiritual healing through the recitation of Quranic verses or magic formulae.\(^{347}\)

**Education**

Before Qadhafi’s reign, schools were few and illiteracy was high, especially in rural areas. Qadhafi’s government introduced mobile schools to provide educational access to extended areas in the Sahara.\(^{348}\) The rise in national literacy rates and attendance at vocational schools and universities suggest this outreach was successful.

**Exchange 64: Is there a school nearby?**

<table>
<thead>
<tr>
<th>Soldier: Is there a school nearby?</th>
<th>fee madirma greeba min eh-ney?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local: Is there a school nearby?</td>
<td>Yes.</td>
</tr>
<tr>
<td></td>
<td>na'am</td>
</tr>
</tbody>
</table>

Past enrollment rates suggest that rural parents traditionally sent girls to school only long enough to acquire basic literacy and numeracy. Such skills were deemed to enhance their marital prospects.\(^{349}\)

**Different Regions and Ways of Life**

In contrast to Libya’s urban majority, rural peoples traditionally produce their own food, shelter, and clothing. Subsistence activities—herding, farming, fishing, cloth-weaving, hide-tanning, tent-pitching, brick-making—fill the days and nights. Berber tribes continue to live in the Jebel Nafusah region of Tripolitania (Libya’s western region), where they still farm and raise animals. They no longer live underground or in caves, but their ancient *qasrs* (fortified cave-like granaries) attest to their long history in the region.\(^{350}\) Long discriminated against by Qadhafi, they joined the revolution early and were essential to rebel victory in Tripoli.\(^{351}\)

---

In southern Tripolitania (around Ghadames) and deep into the Fezzan region (in oasis towns such as Ghat), the nomadic Tuareg continue their pastoral way of life, moving freely across the Sahel and the borders of Libya’s western neighbors. During his rule, Qadhafi recruited many Tuareg into the Libyan armed forces. In 2011, Tuareg leaders in Niger (and Mali) urged Tuareg migrant workers and soldiers in Libya to transfer their support to the rebel government.

In southeast Cyrenaica, deep in the Sahara, the Tebu (Toubou) live an extremely isolated existence in family and clan affiliations. They are farmers and pastoralists in the Tibesti mountain region and maintain their traditional practice of folk Islam. In 2012, Tebu groups fought Arab tribes for control of territory in Al Kufra and over a carjacking in Sabha.

**Road Checkpoints**

Road checkpoints operated by armed personnel are common. During the Qadhafi era, green-uniformed army forces searched for deserters while blue-uniformed local police looked for unlicensed drivers and illegal immigrants.

**Exchange 65: Where is the nearest checkpoint?**

| Soldier: Where is the nearest checkpoint? | weyn agrub nuqTut tafteesh? |
| Local: | It’s two kilometers away. | tub'ud zoz kilomeetar |

Since the 2011 uprising, some local militias are operating checkpoints independently of the national transitional government. They have arrested and detained individuals without authoritative oversight.

**Exchange 66: Is this all the ID you have?**

| Soldier: Is this all the ID you have? | haadee kul il-wathaa-iq ilee 'indik? |
| Local: | Yes. | na'am |

---

Even before the 2011 conflict, visitors encountered checkpoints every 40 km (25 mi), so that vehicles had to pass through one whenever they entered or exited a town.³⁵⁷ Checkpoints effectively prohibited foreigners from traveling at night.

**Exchange 67: Please get out of the car.**

<table>

Land Mines

Landmines and unexploded ordnance (UXO) of both Allied and Axis origins have been a danger in Libya since World War II. Qadhafi-era forces laid more mines during the conflicts with Egypt (1977) and Chad (1980–1987). Human Rights Watch has also reported the use of mines to protect facilities such as ammunition storage areas. In 2011, Qadhafi loyalists reportedly used antipersonnel mines extensively, and rebel forces used antivehicle mines early in the conflict. (The National Transitional Council later agreed to stop the use of landmines.) International demining operators exist to serve oil companies and other commercial interests. An international consortium formed in 2011 to address public safety needs for mine clearance and education programs.\(^{363}\), \(^{364}\)

Chapter 5 Assessment

1. The Sahara long served as a buffer zone between the tribes of Libya.
   **True**
   Their geographic isolation allowed Libya’s rural tribes the relative autonomy to develop their own ways of life.

2. The Berber tribes of Tripolitania’s Jebel Nafusah region remained loyal to Qadhafi in the 2011 civil war.
   **False**
   Berbers in Tripolitania, long repressed by Qadhafi, joined the 2011 rebellion.

3. The Libyan government introduced mobile schools to provide educational access to extended areas in the Sahara.
   **True**
   As part of Qadhafi’s push for universal education, the government introduced mobile schools to provide educational access to extended areas of Libya’s interior.

4. Because of a successful removal program, landmines are no longer a danger along Libya’s borders.
   **False**
   Landmines and unexploded ordnance (UXO) have been a danger in Libya since World War II. Both sides used mines during the 2011 civil war.

5. Thanks to oil wealth, the vast rural Libyan road network is almost entirely paved.
   **False**
   Although the Qadhafi government’s emphasis on expanding transportation infrastructure promoted a dramatic increase in roadways, almost half of Libya’s total road network remains unpaved.
CHAPTER 6: FAMILY LIFE

Introduction
The family is the core of society, according to traditions of Libya’s peoples. Extended families intermarry into clans. Family relationships among clans connect tribes (and tribal conflicts often have roots in family enmities). In Libya, family background is central to personal identity, and determines how others judge character. Most Libyans eventually come home from migrant work or education abroad, whether home is a tent in the desert or a high-rise apartment on the Mediterranean coast.

Exchange 71: Did you grow up here?

<td>Yes. na'am</td>
</tr>
</tbody>
</table>

Powerful economic and political forces shaped Libyan families in the 20th century. Large-scale rural-to-urban migration occurred after the discovery of oil and made the immediate (“nuclear”) family more important than the extended one. When Qadhafi tried to weaken tribal authority and emancipate women, his laws challenged the traditional absolute family control by fathers. Under Qadhafi, the elimination of private businesses, professional associations, and many leisure activities strengthened the family as a focus of social activity, as well as a private refuge from the dangers of political participation. During the 2011 civil war and in the aftermath, Libyan family life was affected in many ways (most unfortunately in the reappearance of honor killings). Libyans are watching for the changes that a new constitution may aim to bring.

---

make to government policies toward the family, and wondering how the implementation of those changes will affect their families.376, 377

Typical Household and Family Structure

The typical Libyan household comprises a man, his wife, their married and unmarried sons, and their unmarried daughters.

Exchange: 72: How many people live in this house?

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>How many people live in this house?</th>
<th>gidaash shaKheS yuskun fee haada il-Hosh?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Eight.</td>
<td>tmaaniya</td>
</tr>
</tbody>
</table>

Traditionally, married sons remain part of their father’s household until the father dies.378 More recently, young couples establish a separate household when they are financially able.379, 380 Adult children prefer to care for their elderly parents at home.381

Exchange 73: Is this your entire family?

<table>
<thead>
<tr>

<td>No.</td>
<td>laa</td>
</tr>
</tbody>
</table>

Gender Relations within the Family

In the private world of the Libyan home, men and women live together and interact freely.382 It is primarily when the public world intrudes upon family privacy (for example, when guests visit) that public formalities such as gender segregation must be observed.383

380 Francesca Di Piazza, Libya in Pictures (Minneapolis: Lerner Publishing Group, 2006), 46.
Exchange 74: Does your family live here?

</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Yes.</td>
<td>na'am</td>
</tr>
</tbody>
</table>

Libyan tradition assigns to men the public activities that support the family—herding and other distant work, representing family interests in public venues, and protecting the family honor. Fathers are patriarchs whose power derives from their position as head of the family. Women traditionally draw their sense of identity and accomplishment from activities in the private sphere on behalf of the family—especially bearing and raising children. Qadhafi emphasized the natural power of mothers in his Green Book. In 2010, a new law granted Libyan nationality in principle to the children of Libyan mothers and foreign fathers. Some believe the law will bring Libyan government benefits to these (formerly uncovered) children, while others await proof of its implementation.

Exchange 75: Are these people part of your family?

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Are these people part of your family?</th>

<th>haadee zojtik?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Yes.</td>
<td>na'am</td>
</tr>
</tbody>
</table>

As a form of protective custody against the prospect of familial retribution, Qadhafi’s government opened “social rehabilitation” facilities for women and girls accused of *zina* (extramarital sex), or those “vulnerable to engaging in moral misconduct.” Even rape victims are at risk of detention if their families reject them. Detainees have no means to challenge their confinement, and detention can be indefinite. Detainees can only be released to the custody of a male family member or a man who is seeking a spouse. Few families are willing to bear the stigma of taking their daughter back. Thus, in the words of a Libyan official, “[T]he only answer is marriage. That is the only way to leave the [social rehabilitation] home.” Whether these facilities continue to operate under the transitional government is unknown.

Family and Peer Relationships

*Children and Adolescents*

Libyans love and value their children. About one-third of the current population are under 14 years of age. Procreation and securing the family lineage are the main purpose of marriage in Libya (and other Arab societies). Boys are often favored over girls, and a wife’s place is not secure until she gives birth to a son. Children are typically raised to put their family’s requirements before their own desires for autonomy and independence. Parents, especially fathers, tend toward an authoritarian communication style, using anger and punishment. Crying children later

---

392 Alison Pargeter, “Women’s Rights in the Middle East and North Africa 2010—Libya,” Freedom House, 3 March 2010, [link](http://www.unhcr.org/cgi-bin/texis/vtx/refworld/rwmain?page=country&amp;docid=4b99012091&amp;skip=0&amp;coi=LYB&amp;query= nondiscrimination&amp;searchin=fulltext&amp;display=10&amp;sort=date#_ednref11)

learn to respond with self-censorship or deception. While grandparents may help with childcare, it would be unseemly for a grandfather to prepare food for his grandchildren. That remains the responsibility of their mother or, in her absence, their grandmother.

**Exchange 77: Do your children go to school?**

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Do your children go to school?</th>
<th>iSghaarik yimshoo lil-madirsar?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>

<td>na'am</td>
</tr>
</tbody>
</table>

The government’s emphasis on education—mandatory for boys and girls, ages 6 to 15—could change the size of families in Libya. (International statistics indicate that the more educated the mother, the fewer children she tends to bear.) UNICEF reported 1.2 million Libyan children returned to school in January 2012.

In 2010, UNICEF reported 17% of Libya’s population between the ages of 10 and 19, and an adolescent birth rate of 4 in 1,000. For a girl’s parents, early marriage was the traditional way to ensure their daughter’s virginity (and preserve their family’s honor). For a young man, the high cost of marriage could delay his achievement of full adulthood for years. Qadhafi’s government lengthened adolescence (for girls in particular) by mandating secondary education and military service, and raising the legal marriage age to 20.

**The Elderly**

Libya reports a long life expectancy at birth of almost 75 years. But fewer than 5% of the current population are 65 or older. Adult children are still considered by society to be responsible for the care of their elderly parents. The question of which child should assume primary responsibility is decided within the family in consultation with the parents. Thus, while the state provides elder care facilities, in reality only those who are childless go to a retirement home. Should an adult child attempt to place a parent there, he would be asked why it is impossible to care for the parent in the home. Acceptable answers would include serious illness such as a stroke or dementia. The parents may distribute their property as they wish among their next of kin. If they failed to leave a will, the state would divide their property in accordance with shari’a law.

---

Marriage & Divorce

Marriage

For Libyans, marriage is a rite of passage. It represents a union between families rather than an arrangement between two individuals. Therefore, the families are involved in identifying appropriate partners. Traditionally, marriage between the children of brothers was preferred. This enabled the family to avoid incorporating outsiders, which would dilute its assets. Rural-to-urban migration has reduced this trend, although marriage within the tribe is still the norm.

Exchange 78: Do you have any brothers?

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Do you have any brothers?</th>
<th>'indik Khuut?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>Yes</td>
<td>na'am</td>
</tr>
</tbody>
</table>

The law now requires both parties reach the age of 20 before marriage, though a judge can grant permission for minors to marry. In addition, the betrothed have the right of consent to the union. Yet the biggest obstacle to matrimony is the prohibitive cost. A Libyan wedding can cost USD 10,000 in a country where the average government salary is less than USD 300 a month.

Exchange 79: Are you married?

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Are you married?</th>
<th>inta mitzawij?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>No</td>
<td>laa</td>
</tr>
</tbody>
</table>

The cost of a wedding is high because of the Libyan tradition of inviting the entire village and clan to celebrate the union. Multiple banquets must be hosted, often spread out over a week. The groom’s family might also provide the new couple with their own housing along with the sizeable dowry (maher) to the woman. The amount and payment schedule is negotiated between the two families. In addition to these formidable initial costs, many young men face bleak employment prospects, casting doubt on their ability to support a family.

---

Exchange 80: Are you the only person who has a job?

<table>
<thead>
<tr>
<th>Soldier:</th>
<th>Are you the only person in your family who has a job?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local:</td>
<td>No.</td>
</tr>
</tbody>
</table>

Polygyny (multiple wives) is permissible in Libya, though it is relatively rare. It requires a man to get the permission of his first wife and to demonstrate the ability to support additional families. Women in newly liberated Libya are concerned that men may revert to imposing polygyny rather than seeking permission.  

**Divorce**

Islamic law allows a man to divorce his wife simply by verbally declaring three times in front of witnesses that the marriage is dissolved. But a court decree of divorce is necessary for it to be legally binding in Libya. Judicial divorces can be granted at the behest of either party or the court, though the latter typically is restricted to the dissolution of incestuous unions or those between a Muslim and non-Muslim. The grounds for fault-based divorce include mental illness, contagious illness, infertility, and impotence. In the case of a no-fault divorce, the court will usually require some reconciliation attempt before granting a decree. Representatives of each side, typically male members of the families, negotiate the terms and conditions of the property settlement.

Although the husband is legally allowed to end the union without grounds (*talaq*), by doing so he assumes responsibility for his ex-wife’s maintenance and forfeits legal claim to the dowry. In reality, if he fails to pay alimony, the woman usually has limited legal recourse. For the wife, dissolution of the marriage contract without reason (*khul*) requires her to repay her dowry and other expenditures assumed by the husband’s side. The negotiated time frame for repayment often stipulates repayment of the dowry upon the wife’s remarriage. In effect, her new husband discharges her debt to the old one.

If there are children, the father is their natural guardian (*al waley*); the mother is the physical custodian—a role distinct from legal custodian—of minor children, who must be supported by their father. In the event of divorce, the Libyan Family Code gives initial physical custody to the mother; if she were unable to fulfill the responsibility, it is assumed by her mother; if she is

---

unable, then the children’s father; and then his mother if he becomes incapacitated.\footnote{412} Women cannot be coerced into waiving their custody rights in exchange for a divorce. Moreover, a mother can assume the financial obligation of maintaining minor children, though if she fails, it reverts to the father.\footnote{413}

**Naming Conventions**

Libyans follow Arab conventions in naming their children.\footnote{414} It is mainly the father’s duty to select a fitting name. Boys’ names include Mourad (desired) or Saif (sword). Girls’ names are often poetic, like Noura (light), or Besma (smile). Names from the Quran are also popular, such as Muhammad (the Prophet), or Fatima (his daughter).\footnote{415}

Traditional Amazigh (Berber) names are meant to represent the identity of the child. Not necessarily of Islamic or Arabic origin, Amazigh male names include Berkan (dark) and Uzmir (powerful). Female names include Tayyurt (moon) and Tizemt (lioness).\footnote{416} The Libyan government tried to assimilate non-Arab tribes by requiring civil registration of names in Arabic and banning the use of non-Arabic names (and non-Arabic languages).\footnote{417, 418}

Chapter 6 Assessment

1. Young married couples often live with the husband’s parents.
   **True**
   Married sons establish their own households upon their father’s death, or when they have the necessary financial resources.

2. Libya under Qadhafi marked motherhood as a woman’s most important social role.
   **True**
   Qadhafi’s *Green Book* emphasized the natural power of mothers. He also promoted education, military service, and public employment for women.

3. Libyans celebrate marriage as a union of two individuals.
   **False**
   For Libyans, marriage is a union between families rather than individuals. Fathers traditionally arranged marriages between children of brothers to avoid incorporating outsiders.

4. Libyan girls are eligible to marry at 16 years of age.
   **False**
   The current law requires both parties to be 20. This law gives girls a longer adolescence (and a lengthier period of responsibility for the family honor).

5. Despite government social welfare programs, Libyan families care for their elderly.
   **True**
   Each family decides which adult child is best positioned to assume primary responsibility for the care of an aging parent.
FINAL ASSESSMENT

1. Tripolitania, the “Western Region,” is Libya’s most populous area.
   True / False

2. There are no natural, surface bodies of fresh water in Libya.
   True / False

3. Libya’s historical regions lost their separate identities during the Italian colonial period and adopted a homogenized, European culture.
   True / False

4. The population of Libya is mostly Tuareg.
   True / False

5. Most Libyans speak Tamazight, the native Berber language.
   True / False

6. In Libya, the practice of separating men and women at public events is attributed to Islamic custom.
   True / False

7. Libya’s Sanusi Brotherhood is a Shi’ite Muslim sect that follows the descendants of Muhammad.
   True / False

8. Mawlid al-Nabi, the Prophet Muhammad’s birthday, is the most widely celebrated of the Muslim holy days in Libya.
   True / False

9. The folk Islam of Libya’s minority communities isolates and subordinates women more severely than the Sunni Islam of the Arab majority.
   True / False

10. Libya’s transitional government of 2012 announced that the newly liberated country would be run according to shari’ā, Islamic law.
    True / False

11. Libya is sometimes described as a “collective culture.” The individual is expected to subordinate personal interests and desires to the good of the group.
    True / False

12. Fridays are the best time to make business arrangements to meet with a Libyan counterpart.
    True / False
13. It is acceptable for guests to tell their Libyan host that they cannot eat spicy food.  
   **True / False**

14. On 1 September, Libyans celebrate Revolution Day, the establishment of the Qadhafi regime.  
   **True / False**

15. Weddings and funerals are traditional social events where men and women are allowed to mingle.  
   **True / False**

16. Libya is known to be a transit and destination country for human trafficking.  
   **True / False**

17. Libyan women cannot work outside their homes in the cities—the risk of encountering an unrelated male is too great.  
   **True / False**

18. Libyans bargain for items when shopping in the local *souk*.  
   **True / False**

19. Public transportation is poor in Libyan cities because most urban residents own government-subsidized cars.  
   **True / False**

20. Libya’s problem with youth unemployment ended with recruiting efforts of local militia during the civil war.  
   **True / False**

21. Despite the conversion of nomads to settled farmers, agricultural production declined during the 1970s.  
   **True / False**

22. Road checkpoints are common in Libya’s interior.  
   **True / False**

23. The Berber, Tuareg, and Tebu are the last remaining tribes of Libya.  
   **True / False**

24. Mobile medical units travel to more remote areas to provide basic healthcare.  
   **True / False**

25. Traditional (and shifting) rivalries between tribes account for many recent conflicts in Libya.  
   **True / False**
26. In the 20th century, social changes reduce the average size of the Libyan household and family.
   True / False

27. Polygamy is permitted in Libya.
   True / False

28. Libyan law prohibits the use of non-Arabic names.
   True / False

29. Only Libyan men are allowed to initiate a divorce.
   True / False

30. Libyan children are brought up to look after the family lineage and reputation.
   True / False
